

Society of Petroleum Geophysicists
INDIA

Society of Petroleum Geophysicists (SPG) India was formed on August 15, 1992 to promote interaction and exchange of technical knowledge among Indian geophysicists.

SPG North American Chapter sustains this effort to engage geophysicists from abroad, especially North America.

NORTH AMERICAN CHAPTER
Society of Petroleum Geophysicists

Bridging the Gap ...

2011, Rice University, Houston

Help us Bridge the Gap ...

Our Strong Points

1. We are in contact with Indian origin geophysicists abroad
2. We are able to provide a platform for students in India and geophysics faculties abroad for opportunities such as internships/PhD/PostDoc

Activities (11-12)

1. Supported one student from India to present paper at SEG-2011 and awarded another student for AGU-2011
2. Affiliated with Geophysical Society of Houston (GSH)
3. Presented 1st SPGNA annual awards for 2010 in 2011
4. Published special issue of Geohorizons (Dec. 2011) on unconventional resources
5. Co-coordinated with various students in India

Explore the Opportunities ...

How We Can Help You

Students in Indian Universities:

1. Support students: financially, research/career guidance
2. Provide resources: online links to geophysical FREE software, data and books (www.spgnorthamerica.org)
3. Provide information on various opportunities available through geophysical societies (SEG and SPG)

Professional Geoscientists

1. Engage industries and universities for various research and training activities
2. Initiate seminars and distinguished lecture series in Indian universities by industry/academy geophysicists

Our Objectives

1. Improve geophysics education and research in India by providing a global platform
2. Promote collaboration between geophysicists in India and abroad
3. Promote participation of Indian students in national and international geophysical conferences, including financial support to attend international conferences in USA
4. Work with SPG India to organize its biennial international conference, and promote SPG-India publication 'Geohorizons'
5. Popularize Geophysics among high school and undergraduate level students
